

Levee FluxWave series is a high-performance shielding component designed to provide effective ventilation while maintaining excellent EMI/RFI shielding performance. It is widely used in EMC chambers, shielded rooms, electronic enclosures, and various industrial applications.

High-quality standards drive Levee to ensure that every vent product delivers performs at its best. Through strict quality control and careful material selection, Levee provide reliable, consistent solutions—giving you complete peace of mind throughout your application.

Type	Dimension (L*W*H,mm)	Cell Size (mm)
LVSP100	100*100*45	∅ 4.2/3.2
LVSP200	200*200*45	∅ 4.2/3.2
LVSP300	300*300*45	∅ 4.2/3.2
LVSP400	400*400*45	∅ 4.2/3.2
LVSP500	500*500*45	∅ 4.2/3.2
LVSP600	600*600*45	∅ 4.2/3.2
LVSP1000	1000*1000*45	∅ 4.2/3.2

4.2 for shielding effectiveness > 100dB, 14kHz to 18GHz  
 3.2 for shielding effectiveness > 100dB, 14kHz to 40GHz  
 Materials: galvanized steel, brass  
 Frames: default 50 mm frame, frameless, customized  
 Other cell size: 5.2 mm, 6.35 mm, etc  
 Other thickness: 25.4mm, etc
